

Help us protect Northwoods land and water!

In 2016, Northwoods Alliance launched its Community Forest and Habitat Conservation Program, to offer positive, tangible, and hands-on examples of the value of conserving healthy, intact habitats. Our Land Conservation Initiative had helped protect the Pilgrim River Forest which includes 1600 acres of land and 3.5 miles of the Pilgrim River and the 1042-acre Upper Wisconsin River Legacy Forest, along with other significant successes. We have also established our first true Community Forest at Wildcat Falls. We are currently making great strides in creating a Headwaters Cedar Community Forest and are looking forward to protecting the Upper Wisconsin River Bird Habitat project.

Northwoods Alliance needs caring and committed individuals to financially support this effort to prevent the loss of ecologically important habitat, water and wildlife. We hope you will join us with support. All donations are dedicated to our projects.

“When we see land as a community to which we belong, we may begin to use it with love and respect.” Aldo Leopold

I want to help support Northwoods Alliance in growing the Northwoods land ethic.
